

Grade 1 Mathematics Unit Preview

Quarter 4: Number Relationships and Computation (Addition and Subtraction of Whole Numbers)

Objectives: (Your student will be able to)

- **Find the missing number (unknown) in a number sentence.** For example, $6 + \square = 11$.
- **Add no more than three number addends with sums to 18.** For example, $8 + 3 + 4 = 15$
- **Solve 2 digit addition problems without regrouping.** For example, $22 + 36 = 58$
- **Subtract whole numbers with no more than two digits in the minuend or the subtrahend without regrouping.** For example, $75 - 41 = 34$

Vocabulary: (Words your student will need to understand)

<ul style="list-style-type: none"> • Addition: To join two or more groups $2 + 3 = 5$ 	<ul style="list-style-type: none"> • Subtraction: To find the difference when two groups are compared or to find out how many are left when items are taken away from a group
<ul style="list-style-type: none"> • Addend: A number that is added to another number in an addition problem 	<ul style="list-style-type: none"> • Difference: The answer to a subtraction problem
<ul style="list-style-type: none"> • Sum: The answer to an addition problem 	<ul style="list-style-type: none"> • Number Sentence: An equation or inequality with numbers

Activities to do with your student (in addition to homework, optional):

- Roll dice and add the numbers together.
- Create addition and subtraction word problems for your student to solve.
- Create number riddles for your student to solve.
- Practice addition and subtraction basic facts.
