Pitch-Or-Play ?

Subtraction

GOAL: To win, each player will choose 5 of his or her differences to add together. The player with the highest sum wins.

1. The player with the longest first name goes first.
2. The first player spins ONE of the spinners (his or her choice).
3. He/she subtracts 0 or 10 from the number, depending on the spinner chosen, and records the difference on the paper in Round 1. Continue for each round.
4. The player decides if he/she will keep the difference as one of his or her 5 chosen scores. If so, the player circles it. If not, the player puts one line through that number.
5. Players take turns spinning, subtracting, and recording.
6. At the end of the tenth round, each player should have 5 circled numbers and 5 crossed out. The players add their five circled numbers together.
7. The player with the highest sum wins.

***** IF A PLAYER SUBTRACTS INCORRECTLY, HE/SHE LOSES A TURN FOR THAT ROUND *****

Subtraction: Zeroes and Tens / SUB Spinner C
